

Hestia™ a Cloud Based Scheduling & Visit Verification Software System

Manage your data easily & securely from anywhere at any time!

Hestia is a state of the art home care visit verification system that now includes an advanced home care scheduling system that allows you to create and manage your home care schedules easily and securely anywhere you have internet access whether you're in the office, working offsite or even in transit. Hestia enables you to manage and track all your home care visits to ensure your business runs more smoothly and your client services are delivered on time!

**Task
Trak**

See in real-time as employees visit their clients

Access your schedules from anywhere

View schedules by Month, Week or Day

Key features of Hestia:

- Competitive pricing and no hardware or software to purchase.
- Secure cloud based worry-free data storage that works on all Internet-enabled devices.
- Advanced scheduling management system with client to caregiver matching & conflict management.
- Integrated visit verification system allows you track your employees in real-time as they see their client's.
- On-Demand reporting allowing you to get the data you want when you need it.
- Hestia reminds staff of care plans during check-in & confirms which tasks were done at check-out.
- Alerts by e-mail, SMS, or through Hestia's secure web portal notify you when staff deviate from their schedules.
- 24/7 customer support and you never have to install any software or updates.
